Your Outsourcing Partner

Hildebrando is the leader in providing near-shore IT and business outsourcing (BPO) in North America: our company, headquartered in Seattle Houston and Monterrey, provides our NAFTA clients with competitively priced solutions, through expert, dedicated professionals in the fields of IT, corporate security and business consulting.

Keeping control of your business

We are only a couple of hours away from every major city of the United States of America, which implies a reduced travel time, a follow the sun work discipline, shared time zones and a familiar management style. Outsourcing has never been so easy! Near-shoring allows for face-to-face interaction between our staff and your leaders.

We are among the few outsourcing businesses who give you full control on your outsourced processes to suit your management needs: Hildebrando middle-management, designers and staff assigned to your projects become an extension of your in-house resources and can be managed by mixed teams so to ease knowledge transfer.

All the facets of Outsourcing

Hildebrando provides a full range of quality nearshore IT and business outsourcing:

- Development division offers system integration, IT consulting and project management, testing factory services, and applications life-cycle management.
- IT outsourcing solutions' division offers IT staff augmentation services, IT infrastructure and facilities, and the Hildebrando software factory services.
- Business process outsourcing division offers human resources services, customer care, corporate security, records management and intelligent printing.
- Cloud computing division.

CONSULTING

Our Consulting Services Practices help our clients to develop industrial strength solutions using advanced software disciplines, including:

- Software Architecture
- Software Engineering
- Enterprise Application
- Business Intelligence

INTEGRATION

We use a variety of technologies including Computer Networking, Enterprise Application Integration, Business Process Management and Interface design and programming to achieve optimum integration results.

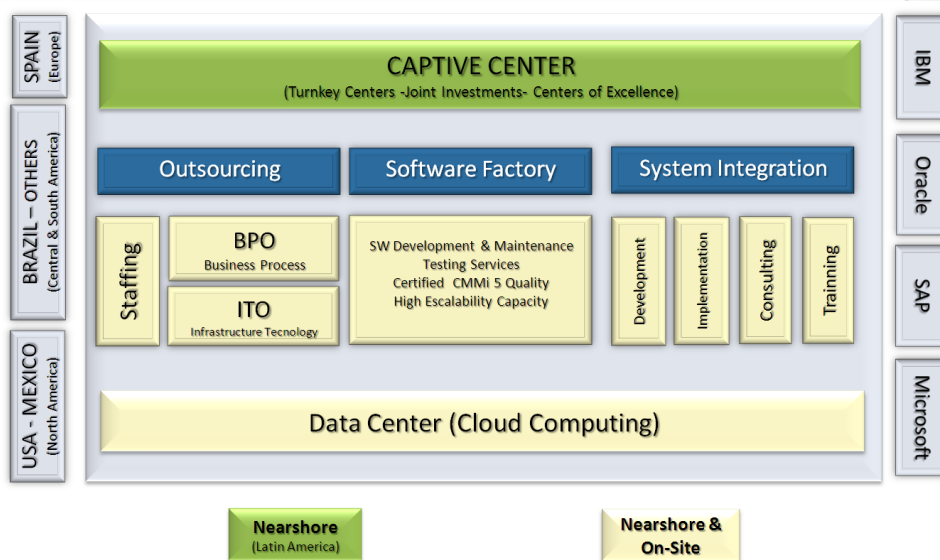

TESTING FACTORY

Our Testing Factory supports Testing Automation, Measurement and Definition of Software Testing Metrics, and advanced testing techniques such as eXtreme Testing, Testing Dirty Systems, Testing under Pressure and Risk-Based Testing.

APPLICATION LIFECYCLE MANAGEMENT

We apply rigorous ALM principles and techniques including project management, project tracking, requirements planning, advanced design and development methods, quality assurance and release management.
